Steps: The following step to upload a Repository to Github via Gitbase.

Step 1: Install Git.

Step 2: Configure Git (only needed once)

Base code or Git terminal: we can follow any one

- I create the repository by git bash:
- o Git config global user.name "alvis-2302031000004"
- Git config-global user. email

2302031000004@silveroakuni.ac.in

Step 3: Create a repository on Github:

- o First I log in to Github.
- Click on "New Repository" ang give it a name.
- Keep it public or private , here I keep public.

Step 4: Go to project folder:

Open the terminal and navigate to the folder containing your files:

Base code = cd..

Cd 2302031000004

Step 5: Initialize Git: (Create a new local repository )

Base code = git init 2302031000004 Step

6: Create the assignment folders:

Base code = mkdir Assignment\_1
mkdir Assignment 2 Step 7: Add the

folder to Git:

Base code= git add Assignment\_1 and Assignment\_2

Step 8: Commit the changes:

Bash code = git commit -m "Added Assignment\_1 and Assignment\_2 folders".

Step 9: Push the Changes to Github:

Bash code = git push -u origin master
